Email: ajit.dhiman16@gmail.com

SUMMARY / ABOUT ME:

MERN Stack/Front-end UI/Web Developer with 10+ years of corporate experience:

- Specialized in developing highly interactive web applications using **ReactJS(9Yr)**, Redux(9), Nextjs(7), Angular(3Yr), Nodejs(2Yr), MongoDB(2Yr), PostgreSQL(1) (with Nextjs), TypeScript(6), React-Native(1.5), JavaScript, Zustand, HTML5 (WACG, ARIA), CSS2/CSS3, SASS/LESS, ES6, JSON, Tailwind CSS, Bootstrap, MaterialUI, AntD and Restful APIs.
- Proficient in UI design practices including user-centered design, UI heuristics, technical writing, and prototyping.
- Experienced in system analysis, design, workflow architecture, development, testing, and maintenance of web-based applications.
- Skilled in creating responsive and mobile-optimized web applications across various devices.
- Working knowledge of server-side technologies and how they should integrate with the user interface
- Mobile Designing and CSS developing (**Phone, Tablets and Android mobiles and testing by Devices and Simulators**)
- Responsible for maintaining the Quality standards like Reviewing Design Documents, Specifications Documents and Code Review
- Demonstrated ability to write clean, efficient HTML5, CSS3, and JavaScript code.
- Cross browser testing (Ex: MAC FF/Safari, Windows FF/Safari, IE9, edge)
- Ability to work in a team and as an individual. Possess strong communication, presentation, Problem-solving and excellent interpersonal skills

Web Technologies	HTML5, CSS2/CSS3, TypeScript, XHTML, JavaScript, jQuery, JSON etc
Framework	ReactJS, Redux, Nextjs, Vite, Angular, Bootstrap, AntD, MaterialUI, Tailwind CSS, React-Native
IDE & Tools	Visual Studio, Cursor, Figma, photoshop etc
Other tools & technologies	NPM, Angular-CLI, React -CLI
Version Controls	SVN, Git, Bitbucket

TECHNICAL SKILLS:

PROFESSIONAL EXPERIENCE

Frontend Lead (Freelance) - [Hocrox]

(Aug 2025 - Present)

- Designed and implemented a reusable component library using **React, TypeScript, Redux, and Tailwind CSS**, improving development consistency, reducing code duplication, and increasing maintainability by **35%**.
- Partnered with backend engineers to define API contracts, integrate RESTful services, and resolve integration issues, reducing API-related defects by **25%** and improving release stability.
- Established frontend development standards through regular code reviews, technical mentoring, and best practices, improving code quality, onboarding, and team productivity.

- Coordinated Agile ceremonies including sprint planning, backlog refinement, daily stand-ups, and retrospectives using **Jira** and **Microsoft Teams/Zoom**, ensuring timely delivery and effective cross-functional communication.
- Collaborated with product managers, UI/UX designers, and QA engineers to translate business requirements into high-quality, user-centric frontend solutions.
- Took ownership of project planning, task prioritization, risk identification, and release coordination, consistently delivering features within sprint timelines.

Frontend Team Lead (Contract Hybrid Work Environment)

APIdots Pvt. Ltd, Mohali (Oct 2024 – July 2025)

- Led a cross-functional frontend team of 6 developers, delivering scalable React.js applications for SaaS-based API platforms.
- Architected and implemented reusable component libraries using React, Redux, TypeScript, and Tailwind CSS, improving code maintainability by 35%.
- Collaborated closely with the backend team on REST API integration, enhancing frontend-backend coordination and reducing API-related bugs by 25%.
- Conducted weekly code reviews and mentoring sessions, improving code quality and junior developer efficiency.
- Spearheaded performance optimization efforts, reducing average page load time.
- Utilized **Team**, **Zoom**, and **Jira** for daily standups, sprint planning, and collaboration.
- Took ownership of task prioritization and self-managed deadlines using Agile workflows.

Sr. Software Engineer (Regular)

Closeloop Pvt. Ltd, Mohali (Dec 2020 – Oct 2024)

- Developed and maintained responsive web applications using **React.js**, **Next.js**, and **Redux**, increasing user engagement.
- Played a key role in redesigning legacy systems, reducing technical debt and improving app performance.
- Integrated third-party services including **Firebase**, **Stripe**, and **Mapbox**, enhancing app functionality.
- Automated CI/CD pipeline using **GitHub Actions**, reducing manual deployment efforts.
- Collaborated with UI/UX designers to convert wireframes into interactive UIs, improving user satisfaction scores.
- Utilized **skype**, **meet**, **Zoom**, and **Jira** for daily standups, sprint planning, and collaboration.
- Mentored 3-5 developers, guiding them through complex React and Next.js projects.
- Regularly handled asynchronous communication across time zones while maintaining project timelines.

Sr. Software Engineer (Regular)

Infostride Pvt. Ltd, Mohali (May 2018 – Nov 2020)

- Designed and developed enterprise-grade web applications using **Reactjs**, **Angular**, **TypeScript**, and **SCSS**.
- Improved frontend performance across multiple apps, achieving Lighthouse performance scores of 90+ consistently.
- Built modular architecture for scalable SPA applications, reducing future development time.
- Worked closely with QA teams to implement automated testing using **Karma** and **Jasmine**.
- Actively participated in Agile ceremonies and sprint planning, helping to deliver 95% of features on time.
- Integrated WebSockets and RESTful APIs for real-time data rendering.

Front-end Developer (Regular)

Wegile Technologies Pvt. Ltd, Mohali (Feb 2016 – Apr 2018)

- Developed mobile-first websites and dashboards using **HTML5**, **CSS3**, **JavaScript**, and **jQuery**.
- Converted UI/UX designs into functional code, ensuring pixel-perfect accuracy across all screen sizes.
- Worked on cross-browser compatibility issues, reducing support tickets.
- Collaborated with backend developers to integrate APIs, ensuring seamless data flow.
- Optimized images, lazy loading, and code splitting to reduce page load times.
- Contributed to multiple client projects in industries including eCommerce, fitness, and logistics.

HTML Developer (Regular)

Miracle Studio, IT Park Chandigarh (Jan 2015 – Jan 2016)

- Hand-coded responsive email templates and landing pages using **HTML**, **CSS**, and **Bootstrap**.
- Ensured cross-platform and cross-browser compatibility for all projects.
- Collaborated with designers to implement pixel-perfect web pages.
- Optimized code for SEO and performance, contributing to a 15% improvement in site rankings.
- Maintained documentation and asset libraries for reusable components.

Web Designer

Adiksu Technologies, Zirakpur (Oct 2013 – Jan 2015)

Web Designer

Climb Solutions Info,, Zirakpur (Feb 2013 – Jul 2013)

PROJECT UNDERTAKEN

Project #: Flora

- **URL:** <https://flora-store.vercel.app/>
- **Environment:** Next.js, React, TypeScript, Tailwind CSS, Zustand, Stripe, PostgreSQL (with Nextjs Dizzle), REST APIs, ESLint, Vercel, Google Tag Manager, SEO Best Practices etc.
- **Team Size:** 1
- **Description:** Developed a modern, full-featured e-commerce web application for botanical products, plants, and floral arrangements designed to deliver a seamless online shopping experience. Built with Next.js and TypeScript, the platform features dynamic product filtering, responsive cart management, smooth checkout flows, secure payment processing, and high-performance server-side rendering (SSR) to ensure fast load times and optimal search engine visibility across all device types.

Responsibilities: Independently designed, developed, and deployed the full-stack e-commerce application using Next.js, TypeScript, Tailwind CSS, and Zustand. Built modular, accessible UI components, managed global cart state with Zustand, integrated secure Stripe payments, and optimized performance and search visibility through SSR, image optimization, GTM analytics tracking, and automated deployment via Vercel.

Project #: The Airport Express

- **URL:** <https://theairportexpress.com>
- **Environment:** Nextjs, Zustand, CSS3, TypeScript, Custom Components, Tailwind CSS, Headless UI, SEO Friendly, Google Tag Manager, Eslint, Stripe, Emailer etc.
- **Team Size:** 1
- **Description:** Developed a modern, SEO-optimized airport transfer booking platform that enables users to book reliable transportation services with a seamless and responsive user experience. Built with **Next.js** and **TypeScript**, the application focuses on performance, scalability, secure online payments, and optimized search engine visibility while delivering a consistent experience across desktop and mobile devices.

Responsibilities: Independently designed, developed, and maintained the entire web application using **Next.js, TypeScript, Tailwind CSS, and Zustand**, building reusable and responsive UI components to deliver a seamless user experience across devices. Implemented dynamic booking workflows, secure **Stripe** payment integration, email notification functionality, and state management while optimizing the application for performance through server-side rendering (SSR), code splitting, image optimization, and SEO best practices. Configured **Google Tag Manager** for analytics tracking, ensured cross-browser compatibility and accessibility, maintained code quality with **ESLint**, and managed the complete development lifecycle from requirement analysis and implementation to deployment and post-launch maintenance as an independent developer.

Project #: AJNA

- **URL:** <https://www.premiertalentpartners.com/>
- **SUB-URL:** <https://premierlogin.ajnainside.com/> (Landing page), <https://premiercandidate.ajnainside.com/login> (candidate portal), <https://premierclient.ajnainside.com/login> (client portal), <https://premieradmin.ajnainside.com/login> (admin portal)
- **Environment:** ReactJS, Redux, CSS3, TypeScript, micro frontend, Custom Components, HTML5, JSON, MVC
- **Backend:** Node.js, MongoDB
- **Team Size:** 15+
- **Duration:** 3+ year
- **Description:** Developed a web app for provide staff recruitment services.

Responsibilities: In my role, I managed a team of frontend developers, ensuring tasks were completed on time and to a high standard. I designed and developed engaging, user-interactive web pages using ReactJS, incorporating custom dynamic components to enhance functionality and user experience. I implemented the MVC design pattern to structure the application efficiently and utilized REST APIs to facilitate seamless communication between the frontend and backend. Additionally, I focused on optimizing application performance by leveraging AJAX for asynchronous data loading and Webpack for effective bundling and asset management.

Some Internal Projects: [dsr.closeloop.com](https://smartrecruiteradmin.closeloop.dev), <https://smartrecruiteradmin.closeloop.dev> (similar like AJNA)

Project #: Telehealth

- **URL:** <https://healthline.bugsover.com/>
- **Environment:** ReactJS, Redux, CSS3, TypeScript, Vite, Custom Components, Tailwind CSS, React-Native for Mobile App etc.
- **Backend:** Node.js, MongoDB
- **Team Size:** 5+
- **Duration:** 6 months
- **Description:** Developed a comprehensive telehealth platform that enables patients to connect with healthcare providers through secure online consultations, appointment scheduling, and real-time communication. The application was built with **React.js (Vite), TypeScript, Node.js, and MongoDB**, delivering a scalable, responsive, and user-centric experience across web and mobile platforms while ensuring high performance, maintainability, and seamless healthcare service delivery.

Responsibilities: Led the development team by planning tasks, reviewing code, mentoring developers, and ensuring the timely delivery of high-quality features. Designed and developed responsive, reusable, and scalable user interfaces using **React.js, TypeScript, Redux, Tailwind CSS**, and custom component architecture. Collaborated closely with backend developers to design and integrate secure REST APIs using **Node.js** and **MongoDB**, ensuring efficient data flow and reliable application performance. Contributed to

the development of the **React Native** mobile application, delivering a consistent and intuitive user experience across web and mobile platforms. Worked closely with product managers, UI/UX designers, and QA engineers throughout the Agile development lifecycle, optimized application performance, resolved production issues, and maintained high code quality through code reviews, best practices, and continuous improvement initiatives.

Project #: 1851 Franchise

- **URL:** <https://1851dev.com>, <https://1851franchise.com/> and <https://brand.1851franchise.com/site/login.html> (admin login)
- **Environment:** Nextjs, Redux, TypeScript, tailwind, Custom Components, JSON, MaterialUI (for input component) etc
- **Team Size:** 4+
- **Duration:** 2+ year

Responsibilities: In my role, I am responsible for developing components based on Figma designs with full functionality using Next.js. I efficiently implemented the application and utilized REST APIs to ensure smooth communication between the frontend and backend. Additionally, I concentrated on optimizing performance by leveraging AJAX for asynchronous data loading and effective asset management.

Sub Projects: <https://1851dev.com/growth-club> (Nextjs, TypeScript, tailwind, Custom Components etc), <https://1851franchise.com/> (Nextjs, TypeScript, tailwind, Custom Components etc), <https://admin.1851dev.com/site/login> (admin portal) (Nextjs, TypeScript, tailwind, MaterialUI, Custom Components etc),

Project #: Aestheticspot

- **Environment:** ReactJS, Redux, webpack, CSS3, AntD, HTML5, JSON, MVC
- **Backend:** Node.js
- **Team Size:** 2
- **Duration:** Under Development
- **Description:** Developed a web app for medical staff management.
- **Responsibilities:** Designed and developed user-interactive web pages using ReactJS and AntD. Implemented MVC design pattern, REST APIs, and improved application performance using AJAX and webpack.

Project #: MexicanLabor

- **Environment:** ReactJS, CSS3, Bootstrap, HTML5, JSON, MVC
- **Backend:** Node.js
- **Team Size:** 2
- **Duration:** 3 months
- **Description:** Created a web app for LLS International Guest Worker Operating System.
- **Responsibilities:** Utilized ReactJS and Bootstrap to develop a single-page application. Collaborated with business analysts to meet client goals and ensured CSS consistency across platforms.

Project #6: Grocery Box

- **Environment:** ReactJS, Redux, webpack, CSS3, Bootstrap, HTML5, JSON, MVC
- **Backend:** Node.js
- **Team Size:** 2
- **Duration:** 5 months
- **Description:** Developed a B2C store application with multiple functionalities.

- **Responsibilities:** Designed and implemented web templates using ReactJS and Bootstrap. Ensured pixel-perfect layout and optimized application performance through AJAX implementation.

Additional Projects:

Saintpure and Sareegalaxy

- **URL:** <http://saintpure.com/> and <http://sareegalaxy.com/>
- **Environment:** HTML5, CSS3, jQuery
- **CMS:** OpenCart
- **Team Size:** 2
- **Duration:** 8 months
- **Type:** E-commerce websites

Video Village Van

- **URL:** <http://videovillagevan.com/>
- **Environment:** HTML5, CSS3, jQuery, Basic PHP
- **CMS:** WordPress
- **Team Size:** 1
- **Duration:** 1 month

ACADEMIC DETAILS:

- BCA (Bachelor of Computer Applications) graduate from Mata Gujri College, Fatehgarh Sahib (Punjabi University) in the year of 2012.
- 12th from JNV Sandhuan

PERSONAL DETAILS:

- **Name:** Ajit Singh
- **Father's Name:** Balbir Singh
- **Date of Birth:** 16 July 1991
